Hours of operation: 24 hours a day, 7 days a week.

Understanding Coverage and Cost-Sharing

Formulary

The Formulary, also known as your Preferred Drug List, is a list of prescription drugs that are covered under your plan. The inclusion of specific medications on the Health Plan formulary is based on the medication's effectiveness, safety, and value.

The formulary offers a wide selection of generic and brand-name prescription drugs suggested by the Pharmacy and Therapeutics (P&T) Committee, a group of physicians and pharmacists who research and evaluate medications. The formulary is periodically reviewed and updated throughout the year in order to ensure that our benefits package consistently and adequately meets your needs.

When you need a prescription medication, you and your doctor can choose from six different levels of the formulary. These are: Generics – Tier 1 and Tier 2, Preferred Brands – Tier 3, Non-Preferred Drugs – Tier 4, Preferred Specialty – Tier 5, and Non-Preferred Specialty – Tier 6. Each level has a different cost-share, which could be a copay or coinsurance, depending on your plan. This gives you and your doctor the freedom to choose the medication that is right for you. At the same time, this will help you to better budget your health care dollars.

Tiers

Drug Tier Quick Reference

Tier	Tier Description
Tier 1	Preferred Generics
Tier 2	Non-Preferred Generics
Tier 3	Preferred Brands
Tier 4	Non-Preferred Drugs (includes brand-name drugs and select generic drugs)
Tier 5	Preferred Specialty Drugs
Tier 6	Non-Preferred Specialty Drugs

Pharmacy Benefits Management

Generic Medications – Tier 1 and Tier 2 have the lowest copayment/coinsurance. Generic drugs offer the same level of safety and quality as their brand-name equivalents. They have the same amount of active ingredients as brand-name medications. You are required to use a generic version of the drug if one is available. **Refer to the “generic drugs” section of your Summary of Benefits and Coverage for your plan’s cost-share amount.**

Preferred-Brand Medications – Tier 3 have the middle level copayment/coinsurance. These drugs are primarily brand medications and “preferred” because of their value and effectiveness. This tier may also include some generic medications. **Refer to the “preferred-brand drugs” section of your Summary of Benefits and Coverage for your plan’s cost-share amount.**

Non-Preferred Drug Medications – Tier 4 have a higher copayment/coinsurance level. These medications are primarily brand drugs that are more expensive and have similar effectiveness as Tier 3 medications. This tier may also include higher cost generic medications. **Refer to the “non-preferred- drugs” section of your Summary of Benefits and Coverage for your plan’s cost-share amount.**

Preferred Specialty Medications – Tier 5 have a higher copayment/coinsurance level. These also include Specialty medications, which usually treat complex and rare conditions. These drugs can be high-cost medications and biologicals regardless of how they are administered (injectable, oral, transdermal, or inhalant).

Non-Preferred Specialty Medications – Tier 6 have the highest copayment/coinsurance level. These also include Specialty medications, which usually treat complex and rare conditions. These drugs can be high-cost medications and biologicals regardless of how they are administered (injectable, oral, transdermal, or inhalant) and have similar effectiveness as Tier 5.

Affordable Care Act/Zero Cost-Share Preventative Drugs – ACA Tier have a zero cost-share copay/co-insurance. These medications are brand and generic preventative drugs that may be covered at \$0 copay provided that certain clinical conditions are met.

\$0 Generics for Several Chronic Conditions

Generic drug coverage is provided at no cost for certain medications used to treat asthma, bipolar disorder, chronic obstructive pulmonary disease, congestive heart failure, coronary artery disease, depression, diabetes, hypercholesterolemia, and hypertension. This benefit does not apply to all plans; please refer to your Summary of Benefits and Coverage for your specific plan benefits. For a listing of these drugs, visit

Pharmacy Benefits Management

Orally Administered Anti-Cancer Medications

Coverage of these medications are subject to the same **Prior Authorization** requirements as intravenously administered injected cancer medications covered by the Health Plan. Orally administered medications cannot cost more than an intravenously injected equivalent. Intravenously injected medications cannot cost more than orally administered medications.

Non-Formulary Medications may be covered if the formulary medications do not work for you. If you require a Non-Formulary medication, your doctor may request coverage for your Tier 4 (Non-Preferred Brand Medications) or your Tier 6 (Non-Preferred Specialty Medications) cost-share by making a request for a coverage exception.

Understanding Our Symbols

Prior Authorization

You will see the symbol “PA” (Prior Authorization) or “MNPA” (Medical Necessity Prior Authorization). Prior Authorization helps ensure that you’re using the best drugs in the safest way.

If you are currently taking or have recently been prescribed one of these drugs, please discuss possible alternatives or have your doctor request authorization.

Drugs that require prior authorization are often:

- Newer drugs for which the Health Plan wants to track usage.
- Non-formulary drugs that require the use of formulary drugs prior to coverage. These drugs are not used as a standard first option in treating a medical condition.
- Drugs with potential side effects that the Health Plan wants to monitor for patient safety.
- Drugs categorized as specialty medications.

In order to initiate a prior authorization request, your doctor may submit a prior authorization by:

- Completing the Uniform Prior Authorization Form (link posted on the Pharmacy page of the True Health New Mexico website)
- Calling the True Health New Mexico Pharmacy Services team at 866-823-1606
- Submitting an electronic PA

Pharmacy Benefits Management

Step Therapy

You will see the symbol “ST” (Step Therapy) next to certain drugs on the formulary tables in this booklet. Step therapy is the practice of treating a patient first with the least costly drug. If that drug does not work for the patient, the Provider will prescribe higher-cost drugs or therapies, if Medically Necessary.

Step therapy applies only to certain drugs and is developed in consultation with the Pharmacy and Therapeutics Committee, a group of practicing physicians and pharmacists who make recommendations on drug management procedures. True Health New Mexico has peer-reviewed criteria for step therapy that helps to decrease the practice of prescribing the most-costly drug when a less costly drug may work just as well. True Health New Mexico Pharmacy Services will need information from your Provider if there is a medical reason that you cannot complete all the steps in the process before moving to the more-costly drug. Medical reasons for not completing step therapy include, but are not limited to, contraindication to the medication or the likelihood that the less costly drug would cause an adverse reaction or be ineffective.

True Health New Mexico Pharmacy Services will respond to requests for exceptions to the Step Therapy program according to the urgency of the situation. In circumstances where a step therapy drug has already been established, True Health New Mexico will provide members impacted by the step therapy program with a temporary supply of medication, pending the outcome of the exception request.

Quantity Limits

The symbol “QL” next to the drugs in this formulary booklet stands for Quantity Limits. To ensure you are getting the most cost-effective dose for your medication, a quantity limit or dose duration may be placed on certain drugs. These limits are based on FDA guidelines, clinical literature, and manufacturer’s instructions. Quantity limits promote appropriate use of the drug, prevent waste, and help control costs.

For some drugs, the dosing guidelines may recommend that patients take the drug one time a day in a larger dose instead of several times a day in smaller doses. The quantity limits follow the guidelines and cover one larger dose per day.

Prescriptions for specialty medications are limited to a 30-day supply. For more information on quantity limits or dose durations, call 866-823-1606.

About Generic Drugs

Pharmacy Benefits Management

Generic drugs have the same active ingredients as their brand-name equivalents but cost significantly less. Not all drugs have a generic equivalent. Generally, new drugs receive patent protection for 20 years. Once the patent expires, other pharmaceutical companies can produce the same drug in a generic formulation. Companies that make generic drugs do not have to invest large amounts of money in research, since the company making the brand-name equivalent has already done this. Also, generic companies do not need to advertise their drugs. As a result, generic drug makers can pass these savings on to you.

Generic drugs have the same active ingredients as brand-name drugs, but their inactive ingredients can vary. This is why the generic drug might look different from the brand-name drug. Inactive ingredients can be dyes used to color the drug or powders used to shape the tablets. Inactive ingredients do not affect how the generic drug works.

The FDA regulates generic drug manufacturers just as it regulates the makers of brand-name medications. The generic drug must pass strict FDA measurements to ensure that it delivers the same amount of the active ingredient in the same time frame as its brand-name counterpart. The manufacturer of the generic drug must prove that it produces its product under the same strict guidelines as the brand-name drug.

Short-Term Medications

These are drugs you need immediately. This includes medications used to treat short term infections, or to relieve pain temporarily. Locate the nearest retail network pharmacy by calling 866-341-8561. To fill your prescription, present your member ID card and written prescription and pay your copayment/co-insurance as described above.

Long-Term Medications

These are drugs you take on a regular basis. These could be drugs to treat asthma, high blood pressure, diabetes, etc. These medications can be mailed to your home for up to a 90-day supply. Please call 866-341-8561 to learn more about your mail-order options.

Note: Individual plan members are limited to no more than a 30-day supply of medications, unless regulations require coverage of a larger supply (for example: contraceptives may be filled for up to a 6-month supply at one time).

Specialty Medications

Specialty medications treat specific medical conditions such as cancer, hemophilia, hepatitis, multiple sclerosis, psoriasis, pulmonary arterial hypertension, respiratory syncytial virus, rheumatoid arthritis, and more. You can fill these prescriptions through CVS Specialty

Pharmacy Benefits Management

Pharmacy. CVS Specialty Pharmacy is a pharmacy that provides specialty medications. Please call 800-237-2767 between the hours of 6:30 a.m. to 8 p.m. (CT) Monday through Friday to learn more about filling your specialty medication.

How to Fill Your Prescription Medications

Filling Your Prescription When Traveling

When you travel outside of your local area, thousands of pharmacies across the country will honor your Health Plan member ID card. To locate a participating pharmacy, call Customer Service at 866-341-8561.

To fill a prescription at a participating out-of-area pharmacy, present your Health Plan member ID card. Some pharmacies may ask you to pay the full price of the medication. If that happens:

- Submit a Direct Reimbursement Claim form to the Health Plan at:
CVS Caremark – RxClaim
P.O Box 52136
Phoenix, AZ 85072-2136
- Or you may call 866-341-
- 8561 for assistance.
- If your claim is approved, you will be reimbursed the amount that you paid for the medication, less the appropriate copayment.

If you will be away from home for an extended period of time, or if you will be traveling outside of the country, you may want to use our mail-order service so that you receive a 90-day supply before you leave home.

Medication Supplies Not Covered by the Health Plan

Medications received at no charge to the member (workers' compensation, medications purchased with a manufacturer's coupon, etc.) will not be covered.

Prescriptions that are written more than a year ago will not be covered. Your doctor will need to write a new prescription.

List of Abbreviations

ACA: Affordable Care Act.

LA: Limited Availability. This prescription may be available only at certain pharmacies. For more information, please call Customer Service at 866-341-8561.

Pharmacy Benefits Management

OTC: Over the Counter. An OTC drug is a non-prescription drug.

PA: Prior Authorization. The Health Plan requires you or your physician to get prior authorization for certain drugs. This means that you will need to get approval before you fill your prescriptions. If you don't get approval, we may not cover the drug.

MNPA: Medical Necessity Prior Authorization. The Plan requires you or your physician to get prior authorization for certain drugs. This means that you will need to get approval for the medical necessity of the drug before you fill your prescriptions. If you don't get approval, we may not cover the drug.

QL: Quantity Limit. For certain drugs, the Health Plan limits the amount of the drug that we will cover.

ST: Step Therapy. In some cases, the Health Plan requires you to first try certain drugs to treat your medical condition before we will cover another drug for that condition. For example, if Drug A and Drug B both treat your medical condition, we may not cover Drug B unless you try Drug A first. If Drug A does not work for you, we will then cover Drug B.
