

True Health New Mexico/OptumRx Infusion Services Site-of-Care Program Fact Sheet

Beginning September 1, 2019, True Health New Mexico members who receive certain infused medications are required to use our site-of-care partner, **OptumRx® Infusion Services**.

Physicians providing infusion therapy of these drugs in an **outpatient-hospital setting** need to transition members to OptumRx Infusion Services. ***However, infusions provided in the provider office setting are still permitted and are NOT impacted by this mandatory program.***
