

Technology Implementation Process

1
IDT/Circle of Support identifies an individual who could benefit from technology

2
IDT/Circle of Support completes the "Are you ready for Tech" screening tool to determine if tech implementation is appropriate

3
Materials/links for various tech solutions provided to individual/guardian
IDT/Circle of Support education is important for successful implementation

4
Vendor is selected

5
Meeting with IDT/Circle of Support and Vendor to choose appropriate solution(s)

6
Vendor develops Tech Design doc

8
IDT/Circle of Support develop the budget and submit for approval

9
Vendor configures solution for individual

7
IDT/Circle of support develops a backup plan
A Task Force liaison will assist with this process

11
Vendor trains DSP, individual and others identified

10
Initial implementation
Supports are provided to the individual as usual, however the tech solution is also utilized.

Transition phase where direct supports may be reduced as milestones are met. Additionally, adjustments to the tech solutions, staffing, etc may need to occur

12
This is not a static process and often multiple adjustments are required
